

## Leading the way in AIDS research

### Nucleoside/Nucleotide Analogs (NRTIs)

**Combivir**  
(zidovudine/  
lamivudine)

**Emtriva**  
(emtricitabine  
or FTC)

**Epivir**  
(lamivudine  
or 3TC)

**Epzicom**  
(abacavir/  
lamivudine)

**Retrovir**  
(zidovudine  
ZDV or AZT)

**Trizivir**  
(abacavir/  
lamivudine/  
zidovudine)

**Truvada**  
(emtricitabine/  
tenofovir DF)

**Videx, Videx EC**  
(didanosine  
or ddl)

**Zerit**  
(stavudine or d4T)

**Ziagen**  
(abacavir  
or ABC)

**Viread**  
(tenofovir DF  
or TDF)

### Multi-Class Drug Combinations

**Atripla**  
(efavirenz/  
emtricitabine/  
tenofovir DF)

**Complera**  
(rilpivirine/  
emtricitabine/  
tenofovir DF)

**Stribild**  
(elvitegravir/cobicistat/  
emtricitabine/  
tenofovir DF)

### Non-Nucleosides (NNRTIs)

**Edurant**  
(rilpivirine  
or RPV)

**Intelence**  
(etravirine  
or ETV)

**Rescriptor**  
(delavirdine  
or DLV)

**Sustiva**  
(efavirenz  
or EFV)

**Viramune**  
(nevirapine  
or NVP)

### Entry Inhibitors

**Fuzeon**  
(enfuvirtide  
or ENF)

**Selzentry**  
(maraviroc  
or MVC)

### Protease Inhibitors (PIs)

**Aptivus**  
(tipranavir or TPV)

**Crixivan**  
(indinavir or IDV)

**Invirase**  
(saquinavir  
or SQV)

**Kaletra**  
(lopinavir/ritonavir)

**Lexiva**  
(fosamprenavir  
or FPV)

**Norvir**  
(ritonavir or RTV)

**Prezista**  
(darunavir or DRV)

**Reyataz**  
(atazanavir or ATV)

**Viracept**  
(nelfinavir or NFV)

### Integrase Inhibitor

**Isentress**  
(raltegravir or RAL)

## We are sharing our lifesaving research to improve lives.

As consumers have become more involved and educated about treatment options, and as new drugs are continuously being developed, the need to clarify rapidly changing drug information is more important than ever. CRI realized this need and developed this unique tool, the HIV Medication Chart, with partial funding from the Office of HIV/AIDS, Massachusetts Department of Public Health.

## We are still searching because people are still suffering.

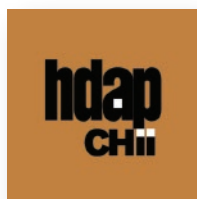

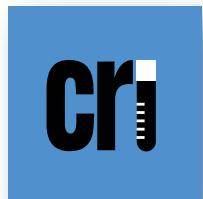

CRI conducts promising research studies of drugs and therapies for people living with HIV and AIDS. We are an independent, nonprofit organization that has been successfully designing, developing, and administering HIV/AIDS clinical trials since 1989. To inquire about a clinical trial, please call 617.502.1700 and dial 3, or use our searchable trials database at [www.crine.org](http://www.crine.org)

## We are ensuring everyone has access to medication.

CRI plays a vital role in making sure all HIV+ Massachusetts residents have access to critical medications. We do this by administering the statewide HIV Drug Assistance Program (HDAP) and the Comprehensive Health Insurance Initiative (CHII). To inquire about HDAP or CHII, please call toll free: 800.228.2714.

## About the HIV Medication Chart

- The chart displays all formulations of each medication currently on the market, including liquid formula when available.
- Medications on the chart are listed in the following order:
  - Grouped by drug class
  - Commercial brand name (in bold)
  - Formal clinical name (in parentheses), which may also be the name used in studies/trials before a drug received FDA approval and became available to the public
- CRI updates the chart as needed, with the date of each version noted.
- The chart can be a valuable tool in education and adherence efforts.
- Sample sets of HIV medication charts are available upon request. For more information and to order charts or other educational materials, please e-mail [spoudel@crine.org](mailto:spoudel@crine.org) or call 617.502.1726.

## Community Research Initiative of New England (CRI)

is an independent, nonprofit, community-based organization dedicated to HIV clinical research, treatment education, and financial assistance for approved drug treatments and health insurance coverage.

Working to improve the lives of people living with HIV/AIDS since 1989, Boston-based **CRI** (led by Dr. Calvin Cohen, Director of Research) has participated in and initiated some of the most promising HIV medication research being conducted in the world. Through its continued outreach efforts, **CRI** provides the latest critical treatment information to clinicians and people living with HIV/AIDS, including women, people of color, and others who have been traditionally underserved.

**CRI** has produced crucial research and drug testing data that has contributed to the FDA approval of almost all of the currently available HIV treatments. What **CRI** discovers from the advanced clinical research it conducts in Massachusetts and other sites across the country has the potential to help people all over the world who are living with HIV.
